Subject: Effect of legal manipulations on price discovery.

****External Email****

Dictated please pardon any errors.

good morning. I have been continuously trying to speak to lula about the events of 2015 since the spring of 2016.

recently I learned that EROS had failed to disclose of default on their debt obligation. I asked for comment. again I received no response.

asensio.com issued an opinion about the 2015 public controversy in 2016.

I firmly believe that it is in the best interest of both the EROS' public stock market price and the market's price discovery mechanism setting that Lula and I meet and that asensio.com issued an update of its opinion about the public controversy of 2015.

clearly shown in the two attachments, there is a very serious problem with EROS' strategy of refusing to communicate with the market and using legal manipulations to chill the markets price discovery process.

I look forward to hearing from you.
